The Digital Markets Act: ensuring fair and open digital markets

Some large online platforms act as "gatekeepers" in digital markets. The Digital Markets Act aims to ensure that these platforms behave in a fair way online. Together with the Digital Services Act, the Digital Markets Act is one of the centrepieces of the European digital strategy.

The Digital Services Act: ensuring a safe and accountable online environment

For the first time a common set of rules on intermediaries' obligations and accountability across the single market will open up new opportunities to provide digital services across borders, while ensuring a high level of protection to all users, no matter where they live in the EU.

MODERN ARCHIVES

PRINCIPLES
AND
TECHNIQUES

BY

T. R. SCHELLENBERG

THE UNIVERSITY OF CHICAGO PRESS

“Records on policy and procedural matters – on general as distinct from specific matters – are difficult to assemble, to organize into recognizable file units, and to identify in such a way that their significance will be made known. Records of routine operations, on the other hand, are easily classified”

Thomas Schellenberg (1956) *Modern Archives: Principles and Techniques*,
p.39

How personal data becomes property (not yours):

- Content brings users
- Users bring personal data
- Personal data are transformed to demographic data
- Demographic data are sold as a service to the commercial users
- Commercial user are selling their services/ goods aiming at an action to the end user
